WINTER TIPS

SAFETY FIRST

Plows are big. They need space.

If you can't see through it, you can't drive through it.

4-wheel drive can get you moving, but ice makes it hard to stop.

Four car lengths is a safe following distance.

DON'T HURRY, PLAN FOR DELAYS

Plows push tons of snow; it is slow work.

Check the forecast.

Call ahead if you will be late.

HELP US KEEP YOU MOVING

If snow is forecast, don't park on city streets.

Don't crowd the plows.

Don't park on the street until snow has been cleared from curb to curb.

GET YOUR SCOOP IN A GROUP

Be a good neighbor. Taking time to clear sidewalks can save others from getting hurt in a fall. Please remember those with limited mobility and disabilities when you clear your sidewalks and curb ramps.

Consider teaming up with others in your neighborhood to help those who are in need to clear their snow and ice.

SNOW & ICE MUST BE CLEARED WITHIN 48 HOURS

Be informed. View the [NEW Brookings Snow/Ice Removal Operation Plan](#), report a concern, or pay a snow ticket. You can also sign up for snow alerts; stay up to date about parking bans and more.
